

Spencer Hance

☎ (203) 240-8072 • ✉ shance@ece.neu.edu • 🌐 www.shance.me
Availability: January-August 2018

Education

Northeastern University

Bachelor of Science, **Computer Engineering**

Boston, MA

December 2018

- IEEE (**Treasurer Fall'16, Fall'17**)
- Beta Gamma Epsilon Engineering Fraternity (**Vice President Fall'17**)

Relevant Coursework

- High Performance Computing (**C, PThreads, OpenMP, OpenMPI, CUDA**), Software Security, Networks, Computer Systems (**C, x86**), Algorithms (**C++**), Digital Logic Design (**Verilog, FPGA, MIPS**), Embedded Design (**C, FPGA**)

Work Experience

MIT Lincoln Laboratory

Technical Assistant - Machine Learning

Cambridge, MA

October 2017 – Present

- Developing Machine Learning pipelines for varied datasets (**Python**)
- Evaluating a meta learning system to automatically select models

Advanced Micro Devices (AMD)

GPU Architecture Co-op

Boxborough, MA

January – July 2017

- Researched new GPU compressed cache designs and presented at internal innovation expo
- Contributed to cache simulator (**C++**) and gained 3x speedup on runtime
- Designed simulation framework (**Bash, Python**) to run and analyze large-scale experiments on LSF cluster
- Implemented Catch unit testing framework and increased code coverage

EnerNOC

Performance Engineering Co-op

Boston, MA

January – December 2016

- Created automated tests to measure web-application performance using JMeter and LoadRunner
- Ported a core algorithm to **Python/OpenCL** and gained a 7x speedup
- Developed a **MEAN.js** application to generate and load test data from Hadoop cluster
- Implemented status pages to monitor production services

Research Experience

International Supercomputing Competitions (SC'15, SC'16, ISC'17, SC'17)

Student Competitor

Boston, MA

July 2015 – Present

- Broke the competition record of the HPCG benchmark at ISC'17 in Frankfurt, Germany
- Won the "MacGyver Award" for sourcing and building a HPC cluster in 6 hours at SC'16
- Evaluated performance of scientific applications and optimized them for the system

NU Computer Architecture Research Group

Undergraduate Researcher

Boston, MA

October 2014 – Present

- Ported over 15,000 lines of **C** to **C++** for Multi2Sim heterogeneous system simulator
- Developed unit tests with Google Test for automated code validation
- Developed a bash tool to run massive GPU fault injection simulations for reliability studies
- Utilized **Python** and SQLite3 to analyze simulation results

Technical Skills

Languages: Python (Pandas, NumPy, Matplotlib), C(++), Bash, JavaScript (MEAN.js)

Technologies: Linux, HPC Concepts, LaTeX, Git, Perforce, GDB, LSF, Splunk, JMeter
